

ATMOSPHERIC CORROSIVITY ASSESSMENT & PROTECTIVE COATING SYSTEMS

8 - 9 September 2026

09:30 hrs - 15:00 hrs

**PARTICIPATION CERTIFICATE WILL BE ISSUED AFTER THE COURSE.**

OBJECTIVE

The objective of this program is to provide participants with a practical understanding of **atmospheric corrosivity assessment and protective coating systems for steel structures**, with emphasis on the application of **ISO 9223 and ISO 12944**. Participants will learn how to assess environmental conditions, determine corrosivity categories, select suitable coating systems, and understand the factors affecting coating performance and durability.

The program will focus on **practical industry applications, coating selection, surface preparation, durability, and corrosion protection strategies** for different atmospheric environments.

TOPICS TO BE COVERED

1. Fundamentals of Atmospheric Corrosion & Corrosivity
2. Atmospheric Corrosivity Assessment as per ISO 9223
3. Corrosivity Categories (C1-CX) and Environmental Classification
4. ISO 12944 – Protective Coating Systems & Selection
5. Surface Preparation, Coating Application & Durability
6. Practical Case Studies: Corrosivity Assessment & Coating Selection

REGISTRATION FEES DETAIL

INR. 5,000 + 18% GST = INR.5,900 per delegate

10% discount for AMPP member and also applicable for 4 participants or more from same organization.
